Improved Malden Mixture

This is a mixture made up by me of all colors, sizes and types, early, midseason and late blooming varieties. You cannot go wrong by buying. This mixture has been greatly improved this year by the addition of many new varieties. 50c. per doz., \$2.75 per 100.

Kunderd's Glory Mixture

Withdrawn to increase stock so I may be able to cut the price way down next season.

Primulinus Hybrids Mixture

These dainty, airy flowers are crossed with the wild species (Primulinus) found near Victoria Falls, South Africa, with our large garden types. They are better adapted for basket or vase than the larger and stiffer varieties. They run mostly in the Nasturtium shades, yellow, orange, cream, pinks, light lavenders, etc. They have fine willowy stems and the flowers on the stem are not set quite so close as the larger varieties. 50c. per doz., \$2.75 per 100.

NEW MONTEBRETIAS

These are very similar in growth to gladiolus and require about the same culture. Only being a smaller bulb not to plant quite so deep 3 in. in light soil and 2 in. in heavy soil. They are fairly hardy south of Philadelphia. Bulbs must be lifted in the north and stored same as Gladiolus. They give a great profusion of blooms from July to frost. A very profitable cut flower for florists. It makes a valuable addition when planted in clumps of 10 to 15 bulbs. I am only listing two varieties this year. Both extra fine reliable varieties to start with.

Crocus Mia Flora. Fine scarlet and yellow. 10c. each, \$1.00 per doz., \$7.00 per 100.

Hereward. Late large flowering yellow. One of the new ones. 20c. each, \$2.00 per doz., \$15.00 per 100.

All Gladiolus Bulbs are 1 $\frac{1}{4}$ in. or over unless otherwise noted, Medium size bulbs about $\frac{3}{4}$ in. to 1 $\frac{1}{4}$ in. small, $\frac{1}{4}$ in. to $\frac{3}{4}$ in.

3 bulbs at dozen rate, 25 at 100 rate
